

Correspondence table between Table No. on Remo and Paper No. on Final Program

Paper No. on Final Program	Remo		Authors	Title
	Floor No.	Table No.		
P01	1	Table 1	Yu Shirafuji and Tomonori Yamada	Defect Detection by Simulation and Machine Learning
P02	1	Table 2	Kohei Saito and Satoshi Kitayama	Short-term prediction using RBF network with coordinate transformation
P03	1	Table 3	Kanako TOYODA and Hiroshi TAMURA	Discrimination of Japanese drum player using machine learning
P04	1	Table 4	Tetsu Takizawa and Akihiro Kudo	Perception of Direction of Moving Sounds. -Study on Adaptive Method-
P05	1	Table 5	Ryota EHARA and Hiroshi TAMURA	A Method for setting up Servers for Edge Computing in Fifth-Generation Mobile Communication Systems
P06	1	Table 6	Koichiro Ishii and Hiroshi Tamura	Solving Sudoku with Graph Convolutional Networks
P07	1	Table 7	Yuto MASHIKO and Hiroshi TAMURA	On delivery methods using UAV in hilly and mountainous areas
P08	1	Table 8	Masato Iida, Sotaro Kudo, Rika Kawahara, Katsuhiko Yamaguchi and Seiki Saito	Development of visualization system for radiation by mixed reality technology
P09	1	Table 9	Nobuyuki Hirooka and Satoru Ushijima	Computation of Micro-particles and Fluid Flow through Porous Structure
P10	1	Table 10	Chen Haosong, Kazutoshi Yoshii and Shigeru Shimamoto	UAV assisted Survivor Search Scheme with Survivor Density Distribution Prediction
P11	1	Table 11	Haruhiko Takeda and Takahiro Saitoh	Elastodynamic analysis of elastic wave scattering using coupling method of CQBEM and FEM
P12	1	Table 12	S. Ushijima, J. Ohno, D. Toriu and Y. Ueno	Particle-scale FSI computation for internal fluidization in gravel-particle bed by upward water jet
P13	1	Table 13	Kakeru Yokoyama, Van-Tinh Nguyen and Hiroshi Hasegawa	Embodiment Design of Biped Robot for Walking on Rough Ground
P14	1	Table 14	Allen Vincent B. Catapang and Motoi Wada	Effect of Adsorption and Reactive Behavior of Water Vapor in Reactive Magnetron Sputtering Simulations using Berg's Model
P15	1	Table 15	James Edward Hernandez, Kengo Moribayashi, James Koga and Motoi Wada	Target ionization and surface damage models of graphite via nanosecond pulse irradiation
P16	1	Table 16	Keith Neelson M. Penado, James Edward A. Hernandez, Allen Vincent B. Catapang and Motoi Wada	Analysis of the space charge effect in an ion mobility spectrometer
P17	1	Table 17	Kazushi Terakawa, Kawanami Ryuta, Haolun Li, Susumu Fujiwara, Tomoko Mizuguchi, Yoshiteru Yonetani and Hiroaki Nakamura	Molecular Dynamics Simulation of Clustered DNA Damage Composed of Apurinic/Apyrimidinic Sites
P18	2	Table 1	ZHOU PEIHAN, Hitoshi Sugimoto and Akira Otsuka	Consideration of environment-friendly manufacturing in China
P19	2	Table 2	Hiroshi Iwata and Sakie Horiuchi	The study on effects of wireless standards on dense Wi-Fi environments with NS3
P20	2	Table 3	Niku Guinea, Daisuke Toriu and Satoru Ushijima	Computational method for interactions between deformable objects and fluid flows using immersed boundary method and mass spring model
P21	2	Table 4	Yusuke Suzuki and Takahiro Saitoh	Simulation of elastic waves in micropolar bimetals using 2-D M-EFIT
P25	2	Table 5	Yuya Fujinaga, Susumu Fujiwara and Tomoko Mizuguchi	Molecular Dynamics Study of Water Dynamics in Zwitterionic Polymer Brush-Water Interface
P26	2	Table 6	Kento Ohnaka and Amane Takei	Development for High-Speed of High-Frequency Electromagnetic Fields Solver: ADVENTURE_FullWave
P27	2	Table 7	Ryo Yoshidome and Amane Takei	Development and application for wave-sound field Solver: ADVENTURE_Sound
P28	2	Table 8	Ryuta Kawanami, Susumu Fujiwara, Hiroaki Nakamura and Kazumi Omata	Molecular dynamics simulation and numeric calculation of a damaged polyethylene assuming tritium substitution and decay
P29	2	Table 9	Yasuyuki Igarashi and Katsuhiko Yamaguchi	Magnetization process analysis of magnetic material with void defect
P30	2	Table 10	Keisuke Uchida and Katsuhiko Yamaguchi	Mechanical properties of hydrogen embrittled austenitic stainless steel
P31	2	Table 11	Sota Suga, Haruka Yamazaki and Katsuhiko Yamaguchi	Simulation for estimation of radiation source distribution measured by NaI(Tl) scintillation detector
P32	2	Table 12	Misaki Uesugi, Tsugiko Takase and Katsuhiko Yamaguchi	Simulation of thermoluminescence measurement of structural materials
P33	2	Table 13	Souta Nishimura and Amane Takei	Study for Development and application of Nonsteady High-Frequency Electromagnetic Field method
P34	2	Table 14	Maho Kuroda, Satoshi Takatori, Chwen-Yang Shew, Takahiro Kenmotsu and Kenichi Yoshikawa	Localization phenomenon of large and small particles by congestion degree and boundary conditions: Cell model experiment on cm scale
P35	2	Table 15	Yuya Sato, Yoko Nakajima and Hiroto Honma	Sightseeing Guidance System to Maximize Satisfaction Using Real-Time Spot Information
P36	2	Table 16	Yohei Tsuchida, Seiki Saito, Hiroaki Nakamura, Yoshiteru Yonetani and Susumu Fujiwara	Evaluation of solvent-accessible surface area of back- bone hydrogen in telomeric DNA for studying tritium resistance of DNA
P37	2	Table 17	Tagami Yukiho, Satoshi Takatori, Takahiro Kenmotsu and Kenichi Yoshikawa	Smart Diagnosis on Disease State based on Characteristic Cracking Pattern by Stretching Response of Tissue Slice
